

Premium Select Decking

Thickness: 2"

Width: 6", 8"

Lengths: 8' - 20'

Looking for a high-quality T&G decking for your next building project?

- Dak Premium Select Decking is a natural wood decking designed to warm and enhance spaces through application on exposed ceilings and floors.
- Available in both **SPRUCE** and **DOUG FIR**, depending on job requirements or design preferences, the choice is yours!
- Dak Deck is manufactured from the highest quality raw material to guarantee strength and durability. We only use J-Grade (Japan grade), the highest grade of dimension lumber during our manufacturing process.
- Dak Deck is produced without holes, wane or loose knots, and is less costly than composite alternatives.

DAK DECK

Recognized as the brand of choice in the log home and timber frame construction industry.
